 - (iii) The "Technical Judge(s)/Technical Panel shall record all Elements and apply the deductions under the obligation of Technical Panels. The Judges shall award the GOE for each Element as well as the Program Components.
 - (iv) One of the "Technical Judges"/Judges shall act as Referee unless a separate Referee has been assigned to the event. He or the Referee alone shall apply the deduction under the obligations of Referees.

Rule 353

ISU Judging System - determination and publication of results

- 1. Basic Principles of Calculation
 - a) Every Section of a Pattern Dance, every Element (i.e. Required Element of the Short Program/Rhythm Dance/Free Dance or Element of the Well Balanced Free Skating Program) has a certain Base Value indicated in the Scale of Value (SOV) chart published in an ISU Communication.
 - b) Each Judge identifies for each Sequence/Section/Element one, or if so published in an ISU Communication, two GOEs. Each GOE has its own positive or negative numerical value as indicated in the SOV chart published in an ISU Communication for each season.

- c) The panel's Grade of Execution (GOE) is determined by calculating the trimmed mean of the numerical values of the Grades of Execution awarded by Judges.
- d) The trimmed mean is calculated by deleting the highest and the lowest values and calculating the average of the remaining values. In the case when there are fewer than five Judges, the highest and lowest values are not deleted from the calculation.
- e) This average will become the final Grade of Execution of an individual Section/Element. The panel's GOE is rounded to two decimal places.
- f) The panel's score for each Section/Element is determined by adding the trimmed mean GOE of this Section/Element to its Base Value.
- g) The panel's scores for all the Sections/Elements are added giving thus the Total Elements Score.
- h) In Single & Pair Skating:
 - i) Jump combinations and Jump Sequences are evaluated as one unit by adding the Base Values of the jumps included and applying the GOE with the numerical value of the most difficult jump.
 - ii) Any additional element or elements exceeding the prescribed numbers will not be counted in the result of a participant. Only the first attempt (or allowed number of attempts) of an Element will be taken into account.
 - iii) In the Short Program and Free Skating of Single Skating the Base Values (but not the GOEs) for jump Elements started in the second half of the program will be multiplied by a special factor 1.1 in order to give credit for even distribution of difficulties in the program. However, only the last one jump element executed in the second half counts for the 1.1 factor in the Short Program, and the last three jump elements for Free Skating. Each factored Base Value for these jump Elements performed in the second half of the Program will be rounded to two decimal places. The second half commences in the middle of the required time without taking into account plus or minus 10 seconds allowance. However, in cases of up to 3 minutes interruptions (as per Rule 515, paragraph 4.b) the factor 1.1 will be used only for jump elements which were started in the second half of the program, but prior to the interruption.

- i) In Ice Dance:
 - i) Combination Lifts are evaluated as one unit by adding the Base Values of the two first executed Types of Short Lifts and then applying the GOE. The GOE of the Combination Lift is equal to the sum of the numerical values of the corresponding GOE of these two first executed Types of Short Lifts.
 - ii) Step Sequences announced by the Ice Dance Technical Committee and published in an ISU Communication if applicable, are evaluated as one unit by adding the Base Values of the Step Sequences of the Woman and the Man and then applying the GOE. The GOE is equal to the sum of the numerical values of the corresponding GOEs of the Step Sequences.
 - iii) Turn Sequences announced by the Ice Dance Technical Committee and published in an ISU Communication if applicable, are evaluated as one unit by adding the Base Values of the executed Types of Turns by the Woman and the Man and then applying the GOE. The GOE is equal to the sum of the numerical values of the corresponding GOEs of the executed Types of Turns.
- j) Each Judge also marks the Program Components on a scale from 0.25 to 10 with 0.25 points increments.
- k) The panel's points for each Program Component are obtained by calculating the trimmed mean of the Judges results for that Program Component. The trimmed mean is calculated in the manner described above in sub-paragraph d).
- l) The trimmed mean of each Program Component is rounded to two decimal places.
- m) The panel's points for each Program Component are then multiplied by a factor such that the Program Component Score is as equivalent as possible to the Total Elements Score as follows (same for Junior and Senior):

Men:	Short Program: <u>1.67</u>	Free Skating: <u>3.33</u>
Women:	Short Program: <u>1.33</u>	Free Skating: <u>2.67</u>
Pairs:	Short Program: <u>1.33</u>	Free Skating: <u>2.67</u>
Ice Dance:	Rhythm Dance: 1.33	Free Dance: <u>2.00</u>
	Pattern Dance: <u>1.17</u>	

The factored results are rounded to two decimal places and added. The sum is the Program Component Score.

n) Deductions are applied for certain violations specified in the Regulations as follows:

Violation:	As per:	Points:
Program time	Rule 502	- 1.0 up to every 5 seconds lacking or in excess
Pattern Dances Program time	Rule 707, paragraph 6	- 1.0 up to every 5 seconds in excess of permitted time after the last prescribed step in the Pattern Dance to the ending movement/pose
Illegal Element/Movement	Rule 504, paragraph 2	- 2.0 per violation
Costume and prop	Rule 501, paragraph 1	- 1.0 per program
Part of the costume/decoration falls on the ice	Rule 501, paragraph 2	- 1.0 per program
Late start	Rule 350, paragraph 2	- 1.0 for start between 1 and 30 seconds late
Fall	Rule 503	<p>*Senior Single Skating: -1.0 for the first and second fall, -2.0 for the third and fourth fall, -3.0 for the fifth and any further falls.</p> <p>*Junior Single Skating: -1.0 for every Fall.</p> <p>*Pair Skating and Ice Dance: -1.0 for every Fall by one partner and -2.0 for every Fall by both partners.</p>
Interruption in performing the program	Rule 515, paragraph 4. a)	For every Interruption of: more than 10 seconds up to 20 seconds: - 1.0 more than 20 seconds up to 30 seconds: - 2.0

		more than 30 seconds up to 40 seconds: - 3.0
Interruption of the program with allowance of up to 3 minutes to resume from the point of interruption.	Rule 515, paragraph 4. b)	- 5.0 per program
Adverse condition prior the beginning of the program with allowance of up to 3 minutes.	Rule 515, paragraph 6	- 5.0 per program
Choreography restrictions	Ice Dance: Rules 709, paragraphs 1.d), g), h) and j) and 710, paragraphs 1.f), h) and j)	-1.0 per program
Extra Elements (Ice Dance only)	Required Elements and principles of calling published in ISU Communications	- 1.0 per violation
Music requirements (Ice Dance only)	Rules 707, paragraph 5, 709, paragraph 1.c)(i) and (ii), and 710, paragraph 1.c)	- 2.0 per program
Tempo specifications (Ice Dance only)	Rules 707, paragraphs 1 and 5 and 709, paragraph 1.c)(iii)	- 1.0 per program
Dance Lift exceeding permitted duration (Ice Dance only)	Rule 704, paragraph 16	- 1.0 per Dance Lift

2. Determination of results in each Segment of the Competition
 - a) The Total Segment Score for each Skater/Pair/Couple in each Segment of a competition (Short Program/Rhythm Dance, Free Skating/Free Dance or Pattern Dance(s)) is calculated by adding the Total Elements Score and the Program Component Scores,

subtracting any deductions for violations described in subparagraph 1.n).

- b) In Ice Dance, for events with two Pattern Dances, the Total Score for each dance will be multiplied by a factor of 0.5.
- c) The Skater/Pair/Couple with the highest Total Segment Score is placed first, the Skater/Pair/Couple with the next highest Total Segment Score is placed second and so on.
- d) If two or more Skaters/Pairs/Couples have the same result, the Total Elements Score will break the tie in the Short Program/Rhythm Dance and the Pattern Dance(s). The Program Components Score will break the tie in the Free Skating/Free Dance. If these results are also equal, the Skaters/Pairs/Couples concerned will be considered as tied.
- e) For any Segment where a Segment factor is applied, the factored Segment Scores are rounded to two decimal places.

3. Determination of the final result

- a) The Total Segment Score of the Short Program/Rhythm Dance or Pattern Dance(s) and Free Skating/Free Dance are added and the result constitutes the Final Score of a Skater/Pair/Couple in a competition. The Skater/Pair/Couple with the highest Final Score is first etc.
- b) In cases of ties after the Final Score the Skater/Pair/Couple with the highest score for the last skated Segment is placed first etc. If there is a tie in the highest score, the better placement will decide the better place. In Ice Dance, if two Pattern Dances are to be skated, both dances are even in value. There are no tie-breaking criteria.
- c) If there is a tie for this Segment, the placement of the previously skated Segment will count for the better place etc. If there is no previous Segment, Skaters/Pairs/Couples are tied.

4. Publication of results

- a) In the publication of the overall results of an event, the eliminated Competitors (Competitors who did not qualify for the next Segment either due to the insufficient scores or due to withdrawal) shall be listed following the Competitors who have successfully finished the competition and such eliminated Competitors will be listed in order of their placement after their last completed Segment.

Disqualified Competitors will lose their placements and be officially noted in the intermediate and final results as disqualified (DSQ). Competitors having finished the competition and who

initially placed lower than the disqualified Competitor(s) will move up accordingly in their placement(s).

- b) Following each Segment, the Total Elements Score, the panel's points obtained in each Program Component, the Program Component Score, the deductions and the Total Segment Score of every Skater/Pair/Couple must be published.
- c) Following each Segment, a printout indicating the Base Values of all the Elements and the GOEs and points for the Program Components from every Judge will be issued. For all figure skating competitions, Championships, Events and Olympic Winter Games, the Judges names and their respective scores will be published.
- d) The final result must be published as soon as possible after the conclusion of the event. This must include for each Skater/Pair/Couple:
 - the final place;
 - separately, the placing in each Segment of a competition.
- e) On conclusion of the event the total points (Final Score) of each Skater/Pair/Couple must be published.

REGULATIONS FOR EXHIBITIONS

Rule 450 Exhibitions

1. Negotiations concerning exhibitions of any kind cannot be conducted with the Skaters, but only with the ISU Member to which the Skater belongs.
2. Notice of exhibitions in a foreign country must be sent by both ISU Members involved to the Director General of the ISU. An ISU Member holding exhibitions in a foreign country must apply for consent from the ISU Member for that country. All financial arrangements must be approved by the ISU Members concerned.
3. If a Skater/Couple stays for a period of more than two months in a foreign country, the ISU Member of the Skater/Couple may provide the foreign ISU Member with a general authorization for exhibitions and so delegate to such ISU Member the responsibility for the application of the eligibility Rules of the ISU and of the foreign ISU Member. The Skater/Couple must, in such case, announce to the foreign ISU Member each request for exhibitions.
4. The provisions of Rule 109, paragraphs 2 and 3, also apply to exhibitions.
5. Eligible persons may take part in ice shows, exhibitions, commercial motion pictures or television shows, in which ineligible persons (as defined in Rule 102, paragraph 2) constitute the majority of the participants, only with the prior approval of the ISU Member concerned.
6. In exceptional cases, the respective Sports Technical Director(s) of the ISU may permit eligible persons to take part in exhibitions in countries in which there is no ISU Member.
7. No exhibitions by a Competitor in an ISU Championship may be given at the site of the Championship or in its neighborhood within a period of fourteen days before the beginning of the event.
8. For exhibitions during Figure Skating Competitions see Rule 365.
9. Competitors in the World Championships invited to participate in the ISU Exhibition Tour may not exhibit more than twenty times in the immediately following forty days. Exceptions may be made by the respective Sports Technical Director(s). No exhibition tours which include such Competitors may take place during such periods unless organized and/or approved by the ISU.
10. Only ISU or ISU Members have the right to organize or authorize

exhibition tours in which eligible Skaters take part.

11. Eligible persons are permitted to appear in only one skating exhibition within one day. If the period covered by a series of exhibitions exceeds a week, there should be a day without an exhibition every three or four days. However, special arrangements may be approved by the respective Sports Technical Director(s) for exhibitions in a foreign country which is geographically isolated and which has little opportunity otherwise to see such exhibitions.
12. The Council of the ISU may make financial arrangements for the benefit of the ISU with ISU Members organizing a series of exhibitions.
13. Participants may receive money for Figure Skating exhibitions at ISU Championships, but only with the approval of the ISU Member to which the Skater belongs and to be paid to the Skater only through the respective ISU Member.

II. TECHNICAL RULES SINGLE & PAIR SKATING / ICE DANCE

GENERAL TECHNICAL RULES IN SINGLE & PAIR SKATING AND ICE DANCE

Rule 500

Definition of the skate blade

Figure Skating blades used during competitions must be sharpened to produce a flat to concave cross section without change to the width of the blade as measured between the two edges. However, a slight tapering or narrowing of the cross section of the blade is permitted.

Rule 501

Clothing

1. At ISU Championships and International Competitions, including the Olympic Winter Games and the Winter Youth Olympic Games, the clothing of the Competitors must be modest, dignified and appropriate for athletic competition – not garish or theatrical in design. Clothing may, however, reflect the character of the music chosen. The clothing must not give the effect of excessive nudity inappropriate for the discipline. Men must wear full length trousers. Accessories and props are not permitted.
Clothing that does not adhere to these guidelines will be penalized by a deduction (see Rule 353, paragraph 1.n).
For Ice Dance, exceptions to the restrictions may be announced by the IDTC.
2. The decorations on costumes must be non-detachable. Part of the costume or decoration falling on the ice will be penalized by a deduction (see Rule 353, paragraph 1.n).

Rule 502

Duration of skating

The time must be reckoned from the moment the Skater (either Skater for Pair Skating and Ice Dance) begins to move or to skate until arriving at a complete stop at the end of the program.

1. Short Program
Women, Men, Pairs for both Senior and Junior:
2 minutes and 40 seconds.

2. Free Skating

Senior:		
Men	4	minutes
Women	4	minutes
Pairs	4	minutes
Junior:		
Men	3 ½	minutes
Women	3 ½	minutes
Pairs	3 ½	minutes

3. Rhythm Dance for both Senior and Junior
2 minutes and 50 seconds (unless otherwise decided by the Ice Dance Technical Committee and announced in an ISU Communication).

4. Free Dance

Senior	4	minutes
Junior	3 1/2	minutes

The Skater/Pair/Couple is allowed to finish the Short Program, Rhythm Dance, Free Skating or Free Dance within 10 seconds plus or minus the required time. If the Skater/Pair/Couple fails to finish his/their Short Program, Rhythm Dance, Free Skating or Free Dance program within the allowed range of time, there will be a deduction (see Rule 353, paragraph 1.n) for up to every 5 seconds lacking or in excess. Any element in Short Program, Rhythm Dance, Free Skating or Free Dance started after the required time (plus the 10 seconds allowed) must not be identified by the Technical Panel and will have no value. The timekeepers must inform the Referee. If the duration of the program is 30 seconds or more under the required time range, no marks will be awarded.

Rule 503 Falls

A Fall is defined as loss of control by a Skater with the result that the majority of his/her own body weight is on the ice supported by any other part of the body other than the blades e.g. hand(s), knee(s), back,

buttock(s) or any part of the arm. For every Fall there shall be a deduction (see Rule 353, paragraph 1.n).

Rule 504

Marking of Short Program/Rhythm Dance and Free Skating/Free Dance

1. Elements Score

As per Rule 353, paragraphs 1. a) and b), the Scale of Values chart of the elements of Short Program/Rhythm Dance and Free Skating/Free Dance is published and updated in ISU Communications. This Scale of Value contains Base Values of all the elements and the numerical values of the eleven Grades of Execution.

a) Base Value

The Technical Panel will determine the name and, when required, the Level of Difficulty of every element. Base Values of elements are measured in points and increase with the increasing difficulty of the elements. The difficulty of the elements depends:

Single & Pair Skating	Ice Dance
<ul style="list-style-type: none"> - in jumps (Singles and Pairs) and throw jumps (Pairs): on the names of the jumps or the throw jumps listed in order of their difficulty (Toeloop, Salchow, Loop, Flip, Lutz, Axel) and the number of revolutions; - in lifts (pairs): on the Groups of the lifts (1 - 5), their names and Levels of Difficulty; - in twist lifts (Pairs): on the number of revolutions and Levels of Difficulty; - in death spirals (Pairs): on the names and Levels of Difficulty; - in other elements: on their names and Levels of Difficulty. 	<p>on their Levels of Difficulty</p>

b) Levels of Difficulty of elements

The description of characteristics (features) that give an element a certain Level of Difficulty is published and updated in ISU Communications.

Single & Pair Skating	Ice Dance
Lifts, twist lifts and death spirals (pairs), spins and steps (singles and pairs) are divided depending on their difficulty in five Levels of Difficulty according to the number of features achieved: Basic Level – in case of no features, Level 1 – in case of one feature, Level 2 – in case of two features, Level 3 – in case of three features and Level 4 – in case of four or more features.	All Required Elements are divided into five Levels of Difficulty according to the number of features achieved. Choreographic Elements, are confirmed if the minimum requirements defining the Element are met.

c) Grade of Execution (GOE)

Each Judge will mark the quality of execution of every element depending on the positive and/or negative features of the execution and errors on an eleven Grade of Execution scale: +5, +4, +3, +2, +1, Base Value, -1, -2, -3, -4, -5. Elements as per Rule 353, paragraphs 1.h) (i) and (ii) (in Single & Pair Skating) and 1.i) (in Ice Dance) are evaluated as one unit. The guidelines for marking GOE's are published and updated in ISU Communications.

2. Illegal Elements/Movements/Pose

Every Illegal Element/Movement/Pose as defined in Rules 610 (Single & Pair Skating), 704 paragraph 21, (Ice Dance), performed in the program will be penalized by a deduction (see Rule 353, paragraph 1.n). If an Illegal Element/Movement/Pose is performed during the execution of any element, the deduction for an Illegal Element/Movement/Pose will apply and the element will be called:

- Single & Pair Skating: Basic Level if the requirements for at least Basic Level are fulfilled;
- Ice Dance: Basic Level if the requirements for at least Basic Level are fulfilled or not confirmed (no level) for Choreographic Elements.

Otherwise the element will be called "no level"

3. Program Component Score

a) Definition of Program Components

The Skater's/Pair's/Couple's whole performance is evaluated by three Program Components: Composition, Presentation and Skating Skills.

For Pair Skating and Ice Dance there must be equal demonstration of the criteria by both Skaters.

Composition

The intentional, developed and/or original arrangement of the repertoire of all types of movements into a meaningful whole according to the principles of proportion, unity, space, pattern, and musical structure.

In evaluating the Composition, the following must be considered:

- Unity;
- Connections between and within elements;
- Pattern and ice coverage;
- Multidimensional movements and use of space;
- Choreography reflecting musical phrase and form.

Presentation

The demonstration of engagement, commitment and involvement based on an understanding of the music and composition.

In evaluating the Presentation, the following must be considered:

- Expressiveness and projection;
- Variety and contrast of energy and of movements;
- Musical sensitivity and timing;
- Unison, oneness and awareness of space (Pair Skating, Ice Dance).

Skating Skills

The ability of the Skater to execute the skating repertoire of steps, turns, and skating movements, with blade and body control.

In evaluating the Skating Skills, the following must be considered:

- Variety of edges, steps, turns, movements and directions;
- Clarity of edges, steps, turns, movements and body control;
- Balance and glide;
- Flow;
- Power and speed.

b) Marking of Program Components

After completion of a program, as per Rule 353, paragraph j), each Judge marks the Program Components on a scale from 0.25 to 10 with increments of 0.25. Points given by the Judges correspond to the following degrees of the Program Components: less than 1 – extremely poor, 1-1.75 - very poor, 2 - 2.75 - poor, 3-3.75 - weak, 4 - 4.75 - fair, 5 - 5.75 - average, 6 - 6.75 - above average, 7 -7.75 - good, 8 -8.75 - very good, 9 – 9.75 excellent, 10 outstanding. Increments are used for evaluation of performances containing some features of one degree and some of the next degree.

Guidelines for marking Program Components are published and updated in ISU Communications.

4. Deductions

Deductions are applied for certain violations of the Regulations (see Rule 353).

Rules 505 – 510 (reserved)

III. TECHNICAL RULES FOR COMPETITIONS IN SINGLE & PAIR SKATING AND ICE DANCE

A. General

Rule 511

Announcement of entries and panels of Officials

For the purpose of verifying the compliance of competitions and categories other than ISU Events, with requirements for World Ranking consideration as published in ISU Communications, preliminary unofficial announcements of entries and Officials must be made by the Organizing Committee at any time after the closing of entries but at the latest seven days before the competition starts. This provision is optional for competitions and categories not considered for World Ranking.

Rule 512

Draws

1. The draws for the starting order of all Segments are made publicly by the Referee. The Referee should ask the Organizing Committee to check the correct spelling of the names of the Competitors and Officials.
2. Starting numbers shall be drawn by each Competitor, if present, by official representatives of their ISU Member or by members of the Organizing Committee.
3. The official announcement of the entries and of the panels of Officials is made by the Referee of each competition at the time of the first starting order draw of that competition. Different procedures may apply for ISU Events and the Olympic Winter Games.

Rule 513

Draws for starting orders

The draw for starting order of the Competitors for each Segment of the event shall be conducted as follows:

1. Short Program/Rhythm Dance or Pattern Dance(s):
 - a) i) select a Competitor to draw for the ISU Member to start the draw;

- ii) draw the starting order of the Competitors proceeding in alphabetical order by ISU Member from the ISU Member drawn to start;

This procedure does not apply to ISU Championships and Olympic Winter Games (see Rule 520, paragraph 1) and the ISU Grand Prix of Figure Skating Series (Senior) and Final Senior and Junior (see Rule 513, paragraph 1 c).

- b) For the Pattern Dances only, if two Pattern Dances are to be skated:

- the Couples are divided into two groups. If the number of Couples is not evenly divisible by two, the second group shall contain one more Couple than the first group;
- the second Pattern Dance is started by the first Couple in the second group followed by the rest of the Couples in the order in which they were drawn. The Couples in group one follow group two, starting with Couple number one of the first group;
- an exception to this Rule is permissible when there are only two Couples. In this case, the first Couple would start each Pattern Dance. This procedure must be agreed to by both Couples.

- c) ISU Grand Prix of Figure Skating Series (Senior) and Final (Senior and Junior):

- i) ISU Grand Prix of Figure Skating Series (Senior): In each ISU Grand Prix of Figure Skating event the participating Competitors will be listed according to their ISU World Standing placement at the time of the event. The starting order in the Short Program/Rhythm Dance will be the reverse order of the ISU World Standings. In the case of any tie, there will be a draw to determine the starting order.

Skaters/Couples, who have not received any ISU World Standing points will be listed at the bottom of the ISU World Standing list in alphabetical order of the ISU Member. There will be a separate draw between those Skaters/Couples with no World Standing points to determine the starting order, following the principles of ISU Rule 513, paragraph 1. a).

- ii) ISU Grand Prix of Figure Skating Final (Senior and Junior): The starting order for the Short Program / Rhythm Dance will be the reverse order of the final standings of the ISU Grand Prix of Figure Skating Series (Senior and Junior). In the case of a tie, there will be a draw to determine the skating order.

2. Free Skating/Free Dance

- a) The starting order is determined from the result of the Short Program/Rhythm Dance or Pattern Dance(s);
- b) As soon as possible after the determination of the results of the preceding Segment, the Referee, in the presence of at least one Competitor, shall divide the Competitors into the smallest possible number of equal groups (see Table I of the Technical Rules), in the order in which they finished the preceding Segment;
- c) If the number of Competitors is not equally divisible, the last group to skate (and as many preceding groups as necessary) must contain one more Competitor than the first group. The lowest placed group must skate first, the next lowest second and so on;
- d) If two or more Competitors are tied for the same place at the end of the preceding Segment, the Competitors concerned shall be drawn in the same group. If necessary the immediately preceding group shall be smaller by the number of Competitors so added to the following group;
- e) The order of skating in each group shall be determined by lot and each Competitor shall be drawn in the order of placement in the preceding Segment of the competition, i.e. with the best placed Competitor drawing first and including those tied. The order of the draw between the tied Competitors shall first be determined by a separate draw prior to the main draw.

For ISU Events, Olympic Winter Games and Winter Youth Olympic Games:

- f) *Women and Men*: The order of skating for the final two groups (i.e. with the best placed Competitors) will be drawn in four subgroups.
 - (i) The top three finishers in the short program will be the last to skate in the final group and will draw from the first subgroup.
 - (ii) The fourth-, fifth- and sixth-place finishers in the short program will be the first to skate in the final group and will draw from the second subgroup.
 - (iii) The seventh-, eighth- and ninth-place finishers in the short program will be the last to skate in the second-to-last group and will draw from the third subgroup.
 - (iv) Tenth-, eleventh- and twelfth-place finishers in the short program will be the first to skate in the second-to-last group and will draw from the fourth subgroup.
- g) *Pairs*: The order of skating for the final two groups (i.e. with the best placed Competitors) will be drawn in four subgroups.

- (i) The top two finishers in the short program will be the last to skate in the final group and will draw from the first subgroup.
 - (ii) The third- and fourth-place finishers in the short program will be the first to skate in the final group and will draw from the second subgroup.
 - (iii) The fifth- and sixth-place finishers in the short program will be the last to skate in the second-to-last group and will draw from the third subgroup.
 - (iv) The seventh- and eighth-place finishers in the short program will be the first to skate in the second-to-last group and will draw from the fourth subgroup.
- h) *Ice Dance*: The order of skating for the final two groups (i.e. with the best placed Competitors) will be drawn in four subgroups.
- (i) The top three finishers in the Rhythm Dance will be the last to skate in the final group and will draw from the first subgroup.
 - (ii) The fourth- and fifth-place finishers in the Rhythm Dance will be the first to skate in the final group and will draw from the second subgroup.
 - (iii) The sixth-, seventh- and eighth-place finishers in the Rhythm Dance will be the last to skate in the second-to-last group and will draw from the third subgroup.
 - (iv) The ninth- and tenth-place finishers in the Rhythm Dance will be the first to skate in the second-to-last group and will draw from the fourth subgroup.
- i) If the size of the subgroups is smaller than the maximum, the subgroups will be adjusted accordingly: in case of even number of entries the subgroups are equal in size, in case of odd number of entries the later skating subgroup is larger by one entry than the previous skating subgroup.

ISU Grand Prix of Figure Skating Series (Senior) and Final (Senior and Junior):

For the Free Skating / Free Dance the starting order will be the reverse order of the result after the Short Program/ Rhythm Dance.

For other International Competitions the Organizers have the option of determining the order of skating according to sub-paragraphs e) to h) of this Rule or using the reverse order of places in the Short Program/Rhythm Dance for the purpose. The method used should be mentioned in the Announcement of the competition.

3. If one or more Competitors having obtained scores that would have qualified them for the next Segment decide to withdraw their participation before the beginning of that Segment, then the open spot(s) will not be substituted by any other Competitor(s) and the

number of maximum qualified Competitors for that Segment will be reduced by the number of withdrawn Competitors.

If the withdrawal(s) is announced after the draw for the starting order of the following Segment, then the starting order and the warm-up groups will not be changed and the spot of the withdrawn Competitor(s) remains empty.

4. If one or more Competitors having obtained scores that would have qualified them for the next Segment are disqualified before the beginning of that Segment, then the open spot(s) will be filled by the first placed Competitor(s), who, in the concerned Segment, initially had not reached the following Segment.

Such Competitors will receive the first starting numbers in the first warm-up group and this warm-up group will be complemented with the concerned number of Competitors. If necessary:

- (i) the starting order of the added Competitors in the first subgroup will be decided by an additional separate draw;
- (ii) Rule 514, paragraph 3 shall apply.

Rule 514 **Warm-up periods**

1. Warm-up periods must be allotted to all Competitors.
2. The duration and maximum size of each warm-up (see Table II of the Technical Rules) are:
 - a) Single Skating – Short Program, Free Skating – 6 minutes duration – maximum six Competitors;
 - b) Pair Skating – Short Program, Free Skating – 6 minutes duration – maximum four Pairs;
 - c) Ice Dance – Pattern Dance(s) – 3 minutes. The first 30 seconds without music followed by 2 minutes and 30 seconds of the sixth (last) tune of the ISU Ice Dance music – maximum six Couples;
 - d) Ice Dance Rhythm Dance/Free Dance
 - i Rhythm Dance, Free Dance (Junior/Senior) – 5 minutes, - maximum five Couples;
 - ii. Free Dance (All Novice categories): – 3 minutes, – maximum five Couples.
3. In the event one or more Competitors tied or added as per Rule 513, paragraph 4 are included in the same group, the maximum number permitted to warm up at the same time may be exceeded by one Competitor in Single Skating. However, if the maximum number

permitted is exceeded by two or more Single Skaters or by one or more Pairs or Ice Dance Couples, the group in question shall be divided into two subgroups with a separate warm-up for each of them. The Competitors of each subgroup skate immediately after the warm-up of their subgroup to be immediately followed by the competitive skating in each instance.

4. Warm-ups must immediately precede the competitive skating of those in that warm-up group. In case of an interruption in the Segment due to unforeseen circumstances of more than 10 minutes, the Competitors concerned will be permitted a second warm-up period of the duration mentioned at paragraph 2, depending on the Segment.

Rule 515

Interruptions, Music Deficiencies, Adverse Conditions and Incomplete Programs

1. An Interruption is defined as the period of time starting immediately when the Competitor stops performing the program or is ordered to do so by the Referee, whichever is earlier, and ending when the Competitor resumes his performance.
The Referee shall decide where the point of interruption is and communicate this to the Competitor, the Judges and the Technical Controller. The Competitor shall resume the program according to paragraphs 2, 3, 4 and 5 below.
The Technical Panel decides if the interruption occurred at the entrance to or during the element. The Technical Controller shall inform the Referee accordingly.
2. Music Deficiencies:
If the tempo or quality of the music is deficient or if for any reason there is an interruption or stop in the music, the Competitor must stop skating when he becomes aware of the problem or at the acoustic signal of the Referee, whichever is earlier.
 - a) If any of these problems regarding the music occurs within the 20 seconds after the start of the program, it is the choice of the Competitor whether to continue from the point of where he stops performing or restart the program. If the Competitor decides to restart the program, the Judges and Technical Panel evaluate the program from the beginning, disregarding the previous evaluation. If the Competitor decides to continue from the point where he stopped performing, the Judges and Technical Panel continue evaluating the program from the moment the Competitor resumes the program and the prior evaluation

remains.

- b) If any of these problems regarding the music occurs more than 20 seconds after the start of the program, the Competitor shall resume the program from the point of interruption or, if the interruption occurred at the entrance to or during an element, at the point immediately preceding this element. If this element was identified and called by the Technical Panel before the interruption, the Technical Panel has to delete it from the list of the performed elements. The Competitor is allowed to repeat this element when resuming the program.

No deductions apply for interruptions due to music deficiencies.

- 3. Adverse conditions unrelated to the Competitor and/or his equipment
If an adverse condition unrelated to the Competitor or his equipment, such as lighting, ice condition, item thrown onto the ice etc. occurs, the Competitor may stop skating and report to the Referee when he becomes aware of the problem and must stop skating at the acoustic signal of the Referee.

When the problem is solved, the Competitor shall continue from the point of interruption or, if the interruption occurred at the entrance to or during an element, at the point immediately preceding this element. If this element was identified and called by the Technical Panel before the interruption, the Technical Panel shall delete it from the list of the performed elements. The Competitor is allowed to repeat this element when resuming the program.

If the interruption lasts longer than 10 minutes, there shall be a second warm-up period according to Rule 514, paragraph 2. After the second warm-up, the Competitor shall continue from the point of interruption or, if the interruption occurred at the entrance to or during an element, at the point immediately preceding this element.

No deductions apply for interruptions unrelated to the Competitor or his equipment.

- 4. Adverse conditions related to the Competitor and/or his Equipment occurring during the program:

If a Competitor is injured during the program or another adverse condition related to him or his equipment (such as but not limited to health problems, nose bleeding, lace undone, damage to clothing or skates) occurs the Competitor must stop skating when he becomes aware of the problem or at the acoustic signal of the Referee, whichever is earlier. The music shall be stopped only if the Referee instructs the music technician to do so according to section b) below.

Duration of Interruptions:

a) Up to 40 seconds

If the adverse condition can be remedied without delay the Competitor does not need to report to the Referee and the music continues to play. If he resumes skating within 40 seconds, the Referee will apply a deduction as per Rule 353, paragraph 1.n).

b) Up to 3 minutes

If the Competitor does not resume skating within 40 seconds, the Referee shall instruct the music technician to stop the music and allow the Competitor 3 additional minutes. If the Competitor resumes skating within this additional period, the Referee will apply a deduction of 5.0 points as per Rule 353, paragraph 1.n) This deduction also covers an interruption of up to 40 seconds immediately preceding the allowance of 3 additional minutes.

When the problem is solved, the Competitor shall continue from the point of interruption or, if interruption occurred at the entrance to or during an element which was called by the Technical Panel before the interruption, at the point immediately following this element. The call made prior to the interruption shall stay.

Only one resumption per program is allowed upon an allowance of additional 3 minutes. If there is a second interruption of more than 40 seconds due to an adverse condition related to a Competitor or his equipment the Competitor shall be considered withdrawn.

5. If medical attention is required, the Referee must stop the performance by an acoustic signal, follow the Medical Protocol (Communication 2267 or any update thereof) and instruct the music technician to stop the music. After consulting with the respective Team Physician, or, if not present, the medical doctor provided by the Organizer, the Referee shall decide if the Competitor is allowed back to compete. If the Referee does not allow the Skater to resume within 3 minutes since the Competitor stopped skating their program, the Competitor is withdrawn. If the Referee allows the Competitor/s to continue skating his program, no deduction will apply. When the problem is resolved, the Competitor shall continue from the point of interruption or, if the interruption occurred at the entrance to or during an element, at the point immediately following this element, which is called by the Technical Panel and the call remains.
6. Adverse condition occurring prior the beginning of the program with allowance of up to 3 minutes.
- i) If any adverse condition related to the Competitor or his equipment occurs between his being called to the start and taking the starting position which cannot be remedied within 60

seconds (Rule 350, paragraph 2), the Referee shall allow the Competitor 3 additional minutes and apply a deduction of 5.0 points as per Rule 353, paragraph 1n).

- ii) If any adverse condition related to the Competitor or his equipment occurs after he takes the ice but before the call to the start and the time before the start of the program is not sufficient to remedy such condition, the Referee shall allow the Competitor 3 additional minutes before being called to the start and apply a deduction of 5.0 points as per Rule 353, paragraph 1n).

7. Adverse condition occurring during the warm up:

If an adverse condition related to the Competitor with the first starting number in the warm up group or his equipment occurs during the warm-up, and time before the call to the start is not sufficient to remedy such condition the Referee shall allow the Competitor 3 additional minutes before being called to the start without applying any deductions. For the purposes of paragraph 4, section b) above of this situation is not considered as resumption of the program.

8. Limit of the interruptions allowed

Only one interruption, up to 3 minutes, is allowed whenever it takes place (prior or during the program). If there is a second interruption of more than 40 seconds due to an adverse condition related to a Competitor (including medical problems) or his equipment the Competitor shall be considered withdrawn.

9. **Incomplete Programs**

If a Competitor does not complete the program, no marks will be awarded and the Competitor shall be considered withdrawn.

 - a) For the purpose of the draw, the Competitors are listed in accordance with the latest ISU World Standings at the time of the Team Leaders Meeting at the respective competition.
 - b) The Competitors will be divided into starting order groups in accordance to Table I of the Technical Rules using the total number of Competitors entered.
 - c) Within the starting order groups, the Competitors will be divided into two equal subgroups, in case of an odd number of Competitors the subgroups with the Competitors drawing for the higher starting numbers will include one more Skater/Pair/Couple.
 - d) There will be a free draw among all Competitors of each such subgroup with the highest ranked Skater/Pair/Couple of the World Standings drawing first and so on.
 - e) In case of ties in the World Standings there will be a separate draw between the tied Competitors to decide the order of the draw. In case of ties in the World Standings on the border of starting order groups or the subgroups, all those tied Competitors will be included in the later group or subgroup and the earlier competing group or subgroup will be smaller by the number of Competitors so added to a later group. However, this procedure has no influence on the size of the warm-up groups for the Short Program / Rhythm Dance or Qualifying Free Skating/Free Dance which strictly follows Table II of the Technical Rules.
 - f) Skaters/Pairs/Couples, who have not received any ISU World Standing points will be listed at the bottom of the list in country order. There will be a separate draw between those Skaters/Pairs/Couples with no World Standing placements to determine the starting order, following the basic principles of the draws.
2. Based on the result of the Short Program/Rhythm Dance, the Competitors placed 1-24 in Single Skating 1-16 in Pair Skating (1-20 in Pair Skating at World Championships) and 1-20 in Ice Dance only shall qualify for the final Free Skating/Free Dance.

Starting with the 2024/25 season, based on the result of the Short Program/Rhythm Dance, the Competitors placed 1-24 in Single Skating, 1-16 in Pair Skating and 1-20 in Ice Dance only shall qualify for the final Free Skating/Free Dance.

3. The starting order for the Free Skating/Free Dance will be according to Rule 513, paragraph 2. f) Women & Men, 2. g) Pairs and 2. h) Ice Dance.
4. If a tie in the Short Program/Rhythm Dance occurs for the 24th place in Single Skating or for the 16th place in Pair Skating (for the 20th place in Pair Skating at World Championships) or for the 20th place in Ice Dance, all the tied Competitors will qualify for the Free Skating/Free Dance for which they will be drawn in the same (first) group.  - c) Thirteen ISU Members are drawn amongst all ISU Members, who have entered a Judge by number for this particular discipline and who have participated with a Skater/Pair/Couple in the same discipline of the corresponding Figure Skating Championships of the immediately preceding year, provided that this Skater/Pair/Couple had finished at least one Segment;
 - d) If there are not enough ISU Members available, there will be an additional draw amongst all ISU Members available and willing to serve but not yet represented in the panel concerned, to complete the panel of Judges with up to thirteen Judges;
 - e) On the site of the Championships, an open random draw will be conducted by the Referee, 45 minutes prior to the skating of each Segment of the respective discipline, in the presence of all Judges drawn for this discipline, to complete the panel of nine Judges;

- f) For the first Segment of the discipline nine Judges will be drawn from all thirteen Judges drawn for the respective discipline. The seating order will be identical to the order the Judges are drawn;
- g) For the second Segment of the discipline, the four Judges not drawn for the first Segment will automatically be assigned to be in the panel of nine Judges for the second Segment and all other Judges serving already in the first Segment will participate in the draw to complete the panel of nine Judges. A separate draw will be held for the seating order of the nine judges;
- h) If at the time of the Championships, Judges drawn and entered by name, are not present, and their entered substitute Judge is not available, they will not be substituted by another Judge from the same ISU Member, who was not entered as a substitute Judge in the discipline in question; A separate draw amongst all Judges present and available for the discipline concerned but not represented already in the particular panel will complete the panel to the possible maximum of nine Judges if needed;
- i) If there still are not enough ISU Members available to draw up to four Judges for the second Segment, up to four alternate Judges are drawn in a priority order amongst all ISU Members, which are entered and eligible for the discipline in question and which are not yet represented in the panel in question. Those alternate Judges must be called on site if needed with a seven days benchmark of notice. If, however, on site not enough Judges as drawn are available to serve in the designated panel and the alternate Judge(s) cannot be anymore called, a draw must be made amongst all present Judges of ISU Members not represented in the panel, willing, qualified and available to serve, who are already drawn in another panel of the Championships.

If there are still not enough Judges for the first segment of the respective discipline, additional Judges from the European ISU Members need to be drawn to complete the panel of Judges.
- e) The procedure described under paragraph 7. d) will be followed in all draws for each first Segment of each discipline of the Championships. III. TECHNICAL RULES SINGLE & PAIR SKATING

A. Single and Pair Skating Elements

Rules 600 – 609 (reserved)

Rule 610

Requirements to elements of Single and Pair Skating and Illegal Elements/Movements

Jump elements

A "jump element" is defined as an individual jump, a jump combination or a jump sequence.

Jump Combinations

In a jump combination the landing foot of a jump is the take-off foot of the next jump. One full revolution on the ice between the jumps (free foot can touch the ice, but no weight transfer) keeps the element in the frame of the definition of a jump combination.

An Euler (half-loop) when used in combinations between two listed jumps becomes a listed jump with the value indicated in the Scale of Value.

If the first jump of a two-jump-combination fails to be successful and turns out as a "non-listed jump", the unit will still be considered as a jump combination.

Jump Sequences

A jump sequence consists of two or three jumps of any number of revolutions, in which the second and/or the third jump is an Axel type jump with a direct step from the landing curve of the first/second jump in to the take-off curve of the Axel jump.

One full revolution on the ice between the jumps (free foot can touch the ice, but without weight transfer) keeps the element in the frame of the definition of a jump sequence.

Jumps executed in a jump sequence receive their full value.

Spins

Positions: There are three basic positions: camel (free leg backwards with the knee higher than the hip level, however Layback, Biellmann and similar variations are still considered as upright spins), sit (the upper part of the skating leg at least parallel to the ice), upright (any position with skating leg extended or slightly bent which is not a camel position).

Layback Spin is an upright spin in which head and shoulders are leaning backward with the back arched. The position of the free leg is optional. *Sideways Leaning Spin* is an upright spin in which head and shoulders are leaning sideways and the upper body is arched. The position of the free leg is optional.

A Spin that has no basic position with two revolutions will receive no Level and no value, however a spin with less than three rotations is considered as a skating movement and not a spin.

The minimum number of revolutions required in a position is two without interruption. In case this requirement is not fulfilled, the position is not counted.

In any spin change of edge can be counted only if done in a basic position. Variations of the position of the head, arms or free leg, as well as fluctuations of speed are permitted.

The change of foot in any spin must be preceded and followed by a spin position with at least three revolutions.

If the Skater(s) fall(s) when entering a spin, or in any failed spin, a spin or a spinning movement is allowed immediately after this fall or failure (for time filling purpose) with this spin or movement not being counted as an element.

If the spinning centers (before and after the change of foot) are too far apart and the criteria of “two spins” is fulfilled (there is a curve of exit after the first part and the curve of entry into the second part), only the part before the change of foot will be called and considered for Levels features.

Spin combinations: Must include a minimum of two different basic positions with two revolutions in each of these positions anywhere within the spin. To receive full value, a Spin combination must include all three basic positions. The number of revolutions in positions that are non-basic is counted in the total number of revolutions. Changing to a non-basic position is not considered as a change of position. A change of foot may be executed in the form of a step over or a jump. The change of foot and the change of position may be made either at the same time or separately.

Spin in one position and (in Singles) Flying spin (which means a spin with a flying entrance and no change of foot and position): positions that are not basic are allowed, counted in the total number of revolutions required by the Rules, but are not valid for Level features.

In spins in one position and flying spins the concluding upright position at the end of the spin (final wind-up) is not considered to be another position independent of the number of revolutions, as long as in such a final wind-up no additional feature is executed (change of edge, variation of position etc).

When the spin is commenced with a jump, no previous rotation on the ice before the take-off is permitted and a step over must be considered by the Judges in the Grade of Execution.

Step Sequences

All step sequences should be executed according to the character of the music. Short stops in accordance with the music are permitted. Step Sequences must fully utilize the ice surface.

Turns and steps must be balanced in their distribution throughout the sequence.

Illegal/Elements Movements are:

- somersault type jumps;
- lifts with wrong holds.

For Senior Women any triple jump is permitted. For Junior Women and Men only the prescribed double or triple jump is permitted.

Jump combinations

c) For Senior Men the jump combination may consist of the same jump or another double, triple or quadruple jump. For Senior Men when a quadruple jump is executed in b), a different quadruple jump can be included in the jump combination. For Senior Women, Junior Men and Women the jump combination may consist of the same jump or another double or triple jump. However, for all categories the jumps included must be different than the solo jump.

If the same jump is executed as a solo jump and as a part of the jump combination, the repeated jump will not be counted (if this repetition is in a jump combination, only the individual jump which is not according to the above requirements will not be counted).

If an extra jump(s) is executed, only the individual jump(s) which is not according to requirements will have no value. The jumps are considered in the order of execution.

Spins

Spin in one position and spin combination: if there is no spin position before and/or after the change of foot with at least three revolutions, the spin is not according to the requirements and no value will be given.

Except flying spins, spins cannot be commenced with a jump.

d) Flying spin:

Senior: Any type of flying spin is permitted with landing position different than in the Spin in one position.

Junior: Only the prescribed type of flying spin is permitted.

Senior and Junior: A step over must be considered by the Judges in the Grade of Execution. A minimum of eight revolutions in the landing position which may be different from the flying position. No previous rotation on the ice before the take-off is permitted. The required eight revolutions can be executed in any variation of the landing position.

e) Spin in one position

Men - spin with only one change of foot:

Senior: The Competitor must choose the camel position or the sit position to be executed, but this position must be different from the landing position of the Flying spin. The spin must consist of only one change of foot, which may be executed in the form of a step over or a jump with not less than

six revolutions on each foot in the chosen basic position.

Junior: Only the prescribed sit or camel position is permitted to be executed. The spin must consist of only one change of foot, which may be executed in the form of a step over or a jump with not less than six revolutions on each foot in the chosen basic position.

e) Women - layback or sideways leaning spin:

Any position is permitted, as long as the basic layback or sideways leaning position is maintained for eight revolutions without rising to an upright position. After the required eight revolutions it is possible to execute the Biellmann position. Change of foot is not allowed.

Women - Spin in one position without change of foot:

Any variation(s) of the chosen position can be executed. Minimum of eight revolutions in this position.

For Men and Women: If the landing position of the Flying spin is the same that in the Spin in one position, the last performed of these two spins will not be counted, but will occupy a spin box.

f) Spin combination:

The spin combination must include only one change of foot with not less than six revolutions on each foot. A change of foot may be executed in the form of a step over or a jump. The change of foot and the change of position may be made either at the same time or separately. See general requirements for a spin combination in Rule 610.

Step Sequences

Unlisted jumps (any number of revolutions) and listed jumps (with maximum one revolution) may be included in the step sequence without any penalties. Listed jumps of not more than one revolution included in the sequence will not be called and will not occupy a box.

Rule 612

Free Skating Singles

1. Free Skating consists of a well-balanced program of Free Skating elements, such as jumps, spins, steps and other linking movements executed with a minimum of two footed skating in harmony with music of the Competitor's choice, vocal music with lyrics is permitted.

Senior Well Balanced Program

A well-balanced Free Skating program for Men must contain:

- maximum of seven jump elements (one of which must be an Axel type jump);
- maximum of three spins, one of which must be a spin combination, one a flying spin or a spin with a flying entrance and one a spin with only one position;
- maximum of one step sequence;
- maximum of one choreographic sequence.

A well-balanced Free Skating program for Women must contain:

- maximum of seven jump elements (one of which must be an Axel type jump);
- maximum of three spins, one of which must be a spin combination, one a flying spin or a spin with a flying entrance and one a spin with only one position;
- maximum of one step sequence;
- maximum of one choreographic sequence.

Junior Well-Balanced Program

A well-balanced Free Skating program for Men must contain:

- maximum of seven jump elements (one of which must be an Axel type jump);
- maximum of three spins, one of which must be a spin combination, one a flying spin or a spin with a flying entrance and one a spin with only one position;
- maximum of one choreographic sequence.

A well-balanced Free Skating program for Women must contain:

- maximum of seven jump elements (one of which must be an Axel type jump);
- maximum of three spins, one of which must be a spin combination, one a flying spin or a spin with a flying entrance and one a spin with only one position;
- maximum of one choreographic sequence.

2. General

The Competitor has complete freedom to select the Free Skating elements, the sum of which will comprise the program.

All elements are to be linked together by connecting steps of a different nature and by other comparable Free Skating movements while fully utilizing the entire ice surface (forward and backward crossovers are not

considered to be connecting steps).

Any additional element or elements exceeding the prescribed numbers will not be counted in the results of a participant. Only the first attempt (or allowed number of attempts) of an element will be taken into account.

Remarks

For all singles Free Programs the following will apply:

Individual Jumps

Individual jumps can contain any number of revolutions.

Jump Combinations and Jump Sequences

A jump combination and a jump sequence may consist of the same or another single, double, triple or quadruple jump. There may be up to three jump combinations or two jump combinations and one jump sequence in the Free Program. One jump combination or one jump sequence may consist of up to three jumps, the other two up to two jumps each.

Repetitions:

Any double jump (including double Axel) cannot be included more than twice in a Single's Free Program (as a Solo Jump or a part of a Jump Combination / Sequence).

Of all triple and quadruple jumps only two can be executed twice. Of the two repetitions only one can be a quadruple jump. If at least one of these executions is in a Jump Combination/ Sequence, both executions are attributed their full numerical value according to the Scale of Value and calculation process described in Rule 353, 1.h), i) and ii).

If both executions are as solo jumps, the second of these solo jumps will be attributed 70% of its numerical value according to the Scale of Value.

Triple and quadruple jumps with the same name will be considered as two different jumps. No triple jump or quadruple jump can be attempted more than twice.

Extra jumps and jump elements:

If an extra jump(s) is executed only the individual jump which is not according to the requirements will have no value. The jumps are considered in the order of execution.

Spins

All Spins must be of a different character. Any Spin with the same character (abbreviation) as the one executed before will be deleted (but will occupy a spinning box).

The spins must have a required minimum number of revolutions: six for the flying spin and the spin with only one position and ten for the spin combination, the lack of which must be reflected by Judges in their marking. These minimum number of required revolutions must be counted from the entry of the spin until its exit (except final wind-up in Spins in one position and Flying spins). In the spin combination and spin in one position the change of foot is optional.

Steps

The Competitors have complete freedom in selecting the kind of step sequence they intend to execute. Any unlisted jumps of any number of revolutions and listed jumps with maximum one revolution can be included in the step sequence without any penalties. Listed jumps of not more than one revolution included in the sequence will not be called and will not occupy a box.

Listed jumps with more than one revolution can also be included in the step sequence; they will be called and will occupy a box. The step sequence must fully utilize the ice surface. Step sequences which are too short and barely visible cannot be considered as meeting the requirements of a step sequence.

Choreographic Sequences

A Choreographic Sequence consists of at least two different movements like spirals, arabesques, spread eagles, Ina Bauers, hydroblading, any jumps with maximum of two revolutions, spins, etc. Steps and turns may be used to link the two or more different movements together. Listed elements included in the Choreographic Sequence will not be called and will not occupy a box. The pattern is not restricted, but the sequence must be clearly visible.

The Technical Panel identifies the Choreographic Sequence which commences with the first skating movement and is concluded with the preparation to the next element (if the Choreographic Sequence is not the last element of the program). It can be performed before or after the Step Sequence.

This element has a fixed base value and will be evaluated by the judges in GOE only.

Rules 613 – 618 (reserved)

C. Pair Skating

Rule 619

Requirements to elements of Pair Skating

General

Pair Skating is the skating of two persons in unison who perform their movements in such harmony with each other as to give the impression of genuine Pair Skating as compared with independent Single Skating; attention should be paid to the selection of an appropriate partner.

All elements are to be linked together by connecting steps of a different nature and by other comparable Free Skating movements, together with a variety of positions and holds, while fully utilizing the entire ice surface.

- a) Both partners need not always perform the same movements; they may separate from time to time, but they must give an impression of unison and harmony of composition of program and of execution of the skating. Movements performed entirely on two feet must be kept to a minimum.
- b) For the purpose of these Rules, a lift means a complete lift including full extension of the lifting arm/s, if required for the type of lift concerned. Small lifts, which may be either ascending and descending or rotational in character, in which the Man does not raise his hands higher than the shoulder level, as well as movements which may include the holding of the Woman by the legs are also permitted.
- c) One skate of the Woman must remain on the ice throughout the death spiral. Multiple execution throughout a program of movements, where neither skate is on the ice must be penalized.
- d) Harmonious steps and connecting movements, in time to the music, should be maintained throughout the program.

Lifts

Pair lifts are classified as follows:

- | | | |
|-------------|---|--|
| Group One | - | Armpit Hold position |
| Group Two | - | Waist Hold position |
| Group Three | - | Hand to Hip or upper part of the leg (above the knee) position |
| Group Four | - | Hand to Hand position (Press Lift type) |
| Group Five | - | Hand to Hand position (Lasso Lift type) |

The Lift's Group is determined by the hold at the moment the Woman passes the Man's shoulder. In Groups 3–5 full extension of the lifting arm(s) is mandatory.

A minimum of one revolution of the Man.

Partners may give each other assistance only through hand-to-hand, hand-to-arm, hand-to-body and hand to upper part of the leg (above the knee) grips. A change of hold means going from one of these grips to another or from one hand to another in a one hand hold. Changes of hold during the lift are permitted.

Woman's positions are classified as follows: Upright (Woman's upper body vertical), Star (Woman's position sideways with upper body parallel to the ice) and Platter (Woman's position flat, facing up or down with upper body parallel to the ice). A change of position means going from one of these positions to another (one full revolution in each position).

For the evaluation of the Technical Panel, the lift is concluded when the Man's arm(s) begin to bend after full extension and consequently the Woman begins to descend. Level features (except related to take-off or landing) are counted from the moment the Man's arms are fully extended until the conclusion of the Lift. Judges evaluate the entire lift from take-off to landing.

Twist lifts

The Woman must be caught in the air at the waist by the Man prior to landing and be assisted to a smooth landing on the ice on a backward outside edge on one foot.

Throw jumps

Throw jumps are partner assisted jumps in which the Woman is thrown into the air by the Man on the take-off and lands without assistance from her partner on a backward outside edge.

Solo jumps, jump combinations and jump sequences

In case of unequal number of revolutions of the partners in a jump performed as a solo jump or part of a combination or a sequence, this jump will be called as a jump with lesser amounts of revolutions executed by the partners.

Death Spirals

In the final position while the Woman is performing the actual death spiral, both the Man and the Woman must execute a minimum of one revolution with the knees of the Man clearly bent and in full pivot position. For a possible higher Level, the Man should stay in a low pivot position (this is when the lower part of his buttocks is not higher than the upper part of the knee of the pivot foot). The Woman simultaneously must skate on a clean

edge with her body and head close to the ice surface, however she must not touch the ice with her head or assist herself with the free hand or any part of the body. The Woman's body weight is supported by the force of the spiraling edge and the hold of the Man.

The Man must be in a centered position with a fully extended arm.

Any kind of position is counted as a feature if Skaters' hold lasts for at least one revolution.

Step sequences

Should be executed together or close together. Step sequence must fully utilize the ice surface. Credit will be given to a pair which changes places and holds or uses difficult skating moves together during a step sequence. The workload between both partners must be even to be taken into account for a possible higher Level.

Rule 620 **Short Programs Pairs**

1. a) The Short Program for pairs (Senior and Junior) consists of seven required elements. The sequence of the elements is optional;
b) The program shall be skated in harmony with the music chosen by the Pair. Vocal music with lyrics is permitted;
c) If an unprescribed or additional element (performed) substitutes a required element (not performed), the respective box will be blocked and this performed element will be considered as not according to the requirements (no value).
d) Unlisted or additional elements such as jumps, spins, steps or repetitions, even of elements which have failed, are not marked and consequently do not block a "box" (spot) of another type of elements.

2. The Senior Short Program shall consist of the following required elements, which form three groups. The groups that are effective on July 1st of each year are:

4. Remarks

Lifts

- a) Only the prescribed overhead lift take-off is permitted.

Throw jumps

- c) For Seniors, any double or triple throw jump is permitted. For Juniors only the prescribed throw jump is permitted.

Solo jumps

- d) For Seniors, any double or triple jump is permitted. For Juniors only the prescribed jump is permitted.

Spins

Solo spin combination

- e) The Solo spin combination must have a minimum of two different basic positions with two revolutions in each of these positions by both partners anywhere within the spin. To receive full value, a Spin combination must include all three basic positions by both partners. Solo spin combinations may be commenced with jumps.

The spin combination must include only one change of foot with not less than five revolutions on each foot by both partners. The change of foot may be executed in the form of a step over or a jump. The change of foot and the change of positions may be made either at the same time or separately.

Death Spirals

- f) Only the prescribed death spiral is permitted.

Death Spiral backward outside:

Both partners are skating on a backward outside edge. The Man performs a pivot and holds the hand of the Woman with the same arm as his skating foot fully extended. The Woman is leaning backwards to the ice and her arm is fully extended as she circles

around the Man in this position. Any variation of the Man's position, skating direction or edge is allowed as long as he keeps the pivot position as described and the Woman circles around him on an outside edge.

Death Spiral forward inside:

The Man is skating on a backward outside edge, and the Woman is skating on a forward inside edge. The Man performs a pivot and holds the hand of the Woman with the same arm fully extended as his skating foot. The Woman is leaning sideways to the ice and her arm is also fully extended as she circles around the Man in this position. Any variation of the Man's position, skating direction or edge is allowed as long as he keeps the pivot position as described and the Woman circles around him on an inside edge.

Death Spiral backward inside:

The Woman is leaning towards the ice and her arm is fully extended and she circles around the Man on a firm backward inside edge.

Death Spiral forward outside:

The same as for the death spiral forward inside, except that the Woman circles around the Man on a firm forward outside edge.

Step sequences

- g) Step sequence should be executed together or close together and may include any unlisted jumps. Short stops in accordance with the music are permitted.

Rule 621 **Free Skating Pairs**

1. Free Skating for pairs consists of a well-balanced program composed and skated to music of the pair's own choice for a specified period of time. Vocal music with lyrics is permitted. A good program contains moves of Single Skating executed simultaneously either symmetrically (mirror skating) or in parallel (shadow skating) and especially typical Pair Skating moves such as pair spins, spirals, lifts, partner assisted jumps and the like, linked harmoniously by steps and other movements.

2. A Senior Well-Balanced Program must contain:

- maximum of three lifts, not all from the same group, with full extension of the lifting arm/s;
- maximum of one twist lift;

- maximum of two different throw jumps;
 - maximum of one solo jump;
 - maximum of one jump combination or sequence;
 - maximum of one pair spin combination;
 - maximum of one death spiral different from the death spiral of the Short Program;
 - maximum of one choreographic sequence.
3. A Junior Well-Balanced Program must contain:
- maximum of two lifts, not all from the same group with full extension of the lifting arm/s;
 - maximum of one twist lift;
 - maximum of two different throw jumps;
 - maximum of one solo jump;
 - maximum of one jump combination or sequence;
 - maximum of one pair spin combination;
 - maximum of one death spiral;
 - maximum of one choreographic sequence.

Any additional element or elements exceeding the prescribed numbers will not be counted in the result of a pair. Only the first attempt (or allowed number of attempts) of an element will be taken into account.

4. Remarks

For all pair programs, the following will apply:

Lifts

All Lifts must have different abbreviations, if two Group 5 Lifts are executed, the take-offs have to be of a different nature (abbreviation). If the take-off is not different, the second executed lift with the same abbreviation will not be marked, but will block a Lift box.

Carry Lifts

- a) Lifts with at least one continuous revolution of the Man may include a carry. Only the first carry included in the one of such lift can be counted for a possible level feature.
- b) Lifts that are just "Carries" consist of the simple carrying of a partner without rotation, only half a revolution of the Man is allowed on the take-off and/or exit. All holds in "Carry" lifts are unrestricted. The carrying of one partner by the other on the back, shoulders or knees is allowed in these lifts. Carry lifts shall not be counted in the number of overhead lifts. These lifts will be considered in the component "Composition". They do not have a value and are not limited in number.

Twist lift

In Free Skating the number of revolutions in the twist lift is not limited. A Lutz, Flip, Toe loop or Axel take-off by the Woman is accepted.

Solo jumps, jump combinations and jump sequences

The jump combination may consist of two or three jumps.

All jumps executed with more than two revolutions (Double Axel and all triple and quadruple jumps) must be of different nature (different name), however the jump combination or sequence can include two same such jumps. If an extra jump(s) is executed, only the individual jump(s) which is not according to the requirements will have no value. The jumps are considered in the order of execution.

Pair Spin Combination

The pair spin combination must have a minimum of two different basic positions with two revolutions in each of these positions by both partners anywhere within the spin.

The pair spin combination must include at least one change of position of both partners.

The pair spin combination must include at least one change of foot of both partners, not necessarily executed by both partners at the same time.

If there is no change of foot or no change of position by both partners, the element will have no value.

The pair spin combination must have a minimum of eight revolutions, the lack of which must be reflected by Judges in their marking. However, a spin with less than three rotations is considered as a skating movement and not a spin. The minimum number of required revolutions must be counted from the entry of the spin until its exit.

Death Spiral

Variations of arm holds and pivot positions (backward or forward) are possible.

For Seniors the death spiral of Free Skating must be of a different type than the death spiral of the Short Program.

Choreographic Sequences

A Choreographic Sequence consists of at least two different movements like spirals, arabesques, spread eagles, Ina Bauers, hydroblading, any jumps with maximum of two revolutions, spins, small lifts etc. Steps and turns may be used to link the two or more different movements together. Listed elements included in the Choreographic Sequence will not be called and will not occupy a box. The pattern is not restricted, but the sequence must be clearly visible.

The Technical Panel identifies the Choreographic Sequence which commences with the first skating movement and is concluded with the preparation to the next element (if the Choreographic Sequence is not the last element of the program).

This element has a fixed base value and will be evaluated by the judges in GOE only.

III. TECHNICAL RULES ICE DANCE

A. Ice Dance definitions

Rule 701 Axis

1. Long Axis – A straight line that divides the ice surface into two halves lengthwise (midline).
2. Short Axis – A straight line that divides the ice surface into two halves crosswise.
3. Continuous Axis – An imaginary line running around the ice surface that serves as the basis for the dance pattern. Usually, in Pattern Dances and Rhythm Dance, the continuous axis consists of two lines running parallel to the long axis of the ice surface, approximately halfway between the long axis and the sides. These lines are joined at each end of the ice surface by a semi-circle. These semi-circles are flattened in some dances so that they run parallel to the ends of the ice surface. In circular dances, such as the Kilian, the continuous axis approximates a circle. The continuous axis of the Paso Doble is an oval.
4. Transverse Axis – An imaginary line intersecting the Continuous Axis of a dance at right angles.

Rule 702 Patterns

The pattern of any dance is the design of the dance on the ice. The diagram of a Pattern Dance includes all the information needed to execute one complete pattern (sequence) of the dance.

1. Set Pattern Dance – A Pattern Dance for which the location, direction and curvature of all edges to be skated are designated in the diagram. This diagram must be followed as closely as possible.
2. Optional Pattern Dance – A Pattern Dance for which the pattern may be altered by a Couple provided that the original step sequences, positions and timing are maintained. Each repetition of the altered pattern must be executed in the same manner and the restart must be commenced from the same place.

3. Lobe – Any sequence of steps on one side of the Continuous Axis that is approximately semi-circular in shape.

Rule 703 **Series of steps**

1. *Introductory Steps* – All Pattern Dances (does not apply to Pattern Dance Elements) may be started with optional introductory steps.
2. *Start of Pattern Dance* – The first step of the Pattern Dance after the Introductory Steps.
3. *Sequence* – The set order of the prescribed steps/turns that compose one pattern (sequence) of a Pattern Dance.
4. *Step Sequence* – A series of prescribed or un-prescribed steps, turns and movements in a Rhythm Dance or a Free Dance. Step Sequences are divided into Types, Groups and Styles.
 - a) There are the following *Types of Step Sequences*, which may be skated either in hold or not- touching.
 - i) *Step Sequences in Hold* must be skated in any Dance Holds or variation thereof (unless otherwise specified by the Ice Dance Technical Committee). Any separation to change a hold must not exceed one measure of music;
 - ii) *Not Touching Step Sequences* must incorporate mirror and/or matching footwork. Both partners may cross each other's tracing(s) and may switch from matching footwork to mirror and vice versa, unless otherwise specified by the Ice Dance Technical Committee. The partners should remain as close together as possible, but they must not touch. The distance between the partners should generally not be more than two arm length apart, except for short distances when the partners are performing edges and turns in opposite directions.
 - b) *Types of Step Sequences* are divided into *Groups*:
 - i) *Group A: Straight Line Step Sequences*
 - *Midline* – skated along the full length of the ice surface on the Long Axis or Short Axis;
 - *Diagonal* – skated as fully corner to corner as possible.
 - ii) *Group B: Curved Step Sequence*
 - *Circular* (may be skated in anticlockwise or clockwise direction) – utilizing the full width of the ice surface on the Short Axis;
 - *Serpentine* – commences in either direction (clockwise or anticlockwise) at the Long Axis at one end of the rink

and progresses in three bold curves or in two bold curves (S-Shaped) and ends at the Long Axis of the opposite end of the rink, the pattern utilizing the full width of the ice surface.

iii) *Group C: Partial Step Sequences*

- *Pattern Dance Type Step Sequence*– performed on the ice surface anywhere or as prescribed by the Ice Dance Technical Committee.

c) *Style of Step Sequences*

Characteristics of Levels of Step Sequences, organized as *Styles*, are technical requirements with ongoing validity and are published in an ISU Communication

Any variation or combination of Groups, or other Groups of Step Sequences as decided upon by the Ice Dance Technical Committee are described and published in an ISU Communication.

5. *Section* – A part of a Sequence of a Pattern Dance.

6. *Pattern Dance Element* – A series of prescribed steps, turns and movements in a Rhythm Dance, consisting of:

- a) a Sequence of a Pattern Dance listed in Rule 707 or
- b) a Section of a Pattern Dance listed in Rule 707 or
- c) a combination of steps/turns from Pattern Dances listed in Rule 707.

Rule 704 Steps, Turns and Movements

1. *Step* – The visible tracing on the ice that is executed on one foot. It may consist of an edge, change of edge, a turn on one foot such as a Three-Turn or Counter or a flat (which usually is not acceptable).

- a) *Edge* – The visible tracing of a skate on one foot that is on one curve;
- b) *Change of Edge* – The visible tracing of a skate on one foot that changes from one curve and edge to a different curve and edge;
- c) *Flat* – The visible double tracing of a skate on one foot that is straight.

2. *Open Stroke* – A step started close beside the skating foot without crossing in front or behind. It should be noted that on all forward edges the free leg is held behind before coming to the skating foot for the next step. On all backward edges the free leg is held forward before returning to the skating foot for the next step.

3. *Cross Stroke* – A step started with the feet crossed so that the impetus or power is gained from the outside edge of the foot that is becoming the free foot. (Note – the legs cross above the knees).
4. *Crossed Step In Front* – A step in which the free foot is placed on the ice on the outer edge side of the skating foot with the free leg tightly crossed in front of the skating leg (note – the legs cross below the knees).
5. *Crossed Step Behind* – A step in which the free foot is placed on the ice on the outer edge side of the skating foot with the free leg tightly crossed behind the skating leg (note – the legs cross below the knees).
6. *Chassé*
 - a) *Simple Chassé* – A series of two edges (usually outside, inside) in which on the second edge the free foot is placed on the ice beside the skating foot, but not ahead of or behind it, and the free foot is lifted with the blade parallel to the ice;
 - b) *Crossed Chassé* is the same as Simple Chassé except that on the second step the free foot crosses the skating foot (crossing behind if the Skater is skating forward, and crossing in front if the Skater is skating backward);
 - c) *Slide Chassé* is the same as Simple Chassé except that on the second step the free foot slides off the ice in front of the skating foot when the Skater is skating forward and to the back if the Skater is skating backward (example: Man's Step 32 in the Starlight Waltz).
7. *Progressive (or Run or Crossover)* – A step or sequence of steps in which the free foot passes the skating foot before it is placed on the ice, thereby bringing the new free foot off the ice trailing the new skating foot.
8. *Roll* – A short or long, forward or backward edge.
 - a) *Swing Roll* – A Roll held for several beats of music during which, when skating backward, the free leg lifts and then first swings forward, then backward past the skating foot, then back beside to skate the next step. When skating forward, the free leg first swings backward, then forward and then back beside to skate the next step. The swing of the leg gives the sense of a “rolling movement”;
 - b) *Cross Roll (Forward/Backward)* - A Roll started with the action of the free foot approaching the skating foot from the side and passing continuously the skating foot on ice to the next outside curve. At the same time, the body weight transfers from one

outside curve to the new outside curve to create a “rolling movement”. Following this action, an outside edge is required.

9. *Slip Step* – A step skated in a straight line with the blades of both skates being held flat on the ice. The weight is over the skating leg that may be well bent or straight while the free foot slides forward on the ice to full extension.
10. *Toe Step* – A step where the Skater steps from one toe to the other without jumping.
11. *Turn*
 - a) *One Foot Turn* – A rotational movement on one foot in which the Skater moves from forward to backward or backward to forward.
 - i) *Three Turn* – A turn executed on one foot from an outside edge to an inside edge or an inside edge to an outside edge, with the exit curve continuing on the same lobe as the entry curve. The Skater turns in the direction of the curve;
 - ii) *American Waltz Type Three Turn (or Swing Three Turn)* – A Three Turn from an outside edge in which the free leg is extended and the toe and hip are well turned out and held over the tracing. The instep of the free foot is drawn close to the heel of the skating foot as the turn is made. After the turn onto an inside edge, the free foot is extended back of the tracing before being brought back beside the skating foot in time for the next step;
 - iii) *European Waltz Type Three Turn* – A Three Turn which begins as in ii). After the turn the back inside edge is held for one beat before the weight is transferred to the free foot as it becomes the skating foot;
 - iv) *Ravensburger Waltz Type Three Turn* – An inside Three Turn that begins as in i) and ii) with the free leg extended over the tracing and left behind during the turn, and swings through after its completion in front of the tracing before being brought back beside the skating foot in time for the next step. (example: Man's Step 1 in the Ravensburger Waltz);
 - v) *Touchdown Three Turn* – A Three Turn in which the weight is almost immediately transferred to the free foot as it becomes the skating foot for the next step. The turn is made from a forward outside three to the backward outside edge of the opposite foot without full weight transfer, then the Skater immediately steps forward onto the original foot (example: Steps 1 and 2 in the Austrian Waltz). Such a sequence may

- be skated with forward or backward, inside or outside Three Turns and may be skated alone or as a Couple side by side;
- vi) *Walk-Around Three Turns* – Three Turns turned by a Couple at the same time around a common axis. The partners skate these turns in Waltz Hold (example: Step 29 to 31 in the Austrian Waltz, Steps 39 and 40 in the Ravensburger Waltz) or offset in partial Tango Hold (Steps 1 to 5 in the Golden Waltz);
 - vii) *Bracket* – A turn executed on one foot from an outside edge to an inside edge or an inside edge to an outside edge, with the exit curve continuing on the same lobe as the entry curve. The Skater turns in the direction opposite to the curve;
 - viii) *Rocker* – A turn executed on one foot from an outside edge to an outside edge or an inside edge to an inside edge, with the exit curve on a different lobe from the entry curve. The Skater turns in the direction of the entry curve;
 - ix) *Counter* – A turn executed on one foot from an outside edge to an outside edge or an inside edge to an inside edge, with the exit curve on a different lobe from the entry curve. The Skater turns in the direction opposite to the entry curve (i.e. in the direction of the exit curve);
 - x) *Swing Rocker or Counter* – A type of Rocker or Counter in which the free foot swings smoothly past close to the skating foot before the turn and after the turn is either moved past the skating foot and held behind over the tracing or allowed to swing forward.
- b) *Two Foot Turn* – A rotational movement from one foot to the other foot in which the Skater moves forward to backward or backward to forward
- i) *Mohawk* – A turn from one foot to the other in which the entry and exit curves are continuous and of equal depth. The change of foot is from an outside edge to an outside edge or from an inside edge to an inside edge.
 - *Open Mohawk* – A Mohawk in which the heel of the free foot is placed on the ice at the inner side of the skating foot, the angle between the two feet being optional. Following the weight transfer, the immediate position of the new free foot is behind the heel of the new skating foot (examples: the Man's Steps 8 and 9 and the Woman's Steps 12 and 13 in the Fourteenstep);
 - *Closed Mohawk* – A Mohawk in which the instep of the free foot is brought to the heel of the skating foot until the

free foot is placed on the ice behind the heel of the skating foot. Following the weight transfer, the immediate position of the new free foot is in front of the new skating foot (examples: Steps 11 and 12 of the Rocker Foxtrot);

- *Swing Mohawk* – An Open or Closed Mohawk in which the free leg swings forward closely past the skating leg, and then back to the skating foot to execute the turn (examples: Steps 20 and 21 in the Tango).
- ii) *Choctaw* – A turn from one foot to the other in which the curve of the exit edge is opposite to that of the entry edge. The change of foot is from outside edge to inside edge or inside edge to outside edge. Unless otherwise specified in the dance description, the free foot is placed on the ice close to the skating foot. The entry and exit edge are of equal depth.
- *Open Choctaw* – A Choctaw in which the free foot is placed on the ice at the inner side of the skating foot. Following the weight transfer the immediate position of the new free foot is behind the heel of the new skating foot;
 - *Closed Choctaw* – A Choctaw in which the instep of the free foot is brought to the heel of the skating foot until the free foot is placed on the ice behind the heel of the skating foot. Following the weight transfer the immediate position of the new free foot is in front of the new skating foot (example: Steps 12 and 13 in the Blues);
 - *Swing Choctaw* – An Open or Closed Choctaw in which the free leg swings forward closely past the skating leg and then back to the skating foot to execute the turn (example: Steps 5 and 6 [first part] of the Quickstep);
 - *Crossed Open Choctaw* – A Choctaw in which the outside of the free foot is held in front of and at right angles to the skating foot. The hip is open after the turn. It may be wide-stepped (example: Steps 11 and 12 in the Rhumba).
- c) *Twizzle* – A traveling turn on one foot with one or more rotations which is quickly rotated with a continuous (uninterrupted) action. The weight remains on the skating foot with the free foot in any position during the turn then placed beside the skating foot to skate the next step. A series of checked Three Turns is not acceptable as this does not constitute a continuous action. If the traveling action stops during the execution, the Twizzle, it becomes a Solo Spin (Pirouette).

The four different types of *entry edges* for Twizzles are as follows:

- Forward Inside;
- Forward Outside;
- Backward Inside;
- Backward Outside.

- d) *Twizzle Like Motion* – While the body performs one full continuous rotation, the skating foot technically executes less than a full turn followed by a step forward.

12. *Turn Sequences*

i) Set of Twizzles

a) *Set of Synchronized Twizzles* – A series of two Twizzles for each partner with up to four steps between Twizzles;

b) *Set of Sequential Twizzles* – A series of two Twizzles for each partner with up to one step between Twizzles.

For both a) and b), each Twizzle shall be at least one full rotation on one foot performed simultaneously (at the same time) by both partners.

ii) One Foot Turns Sequence

Specified Turns performed on one foot by each partner simultaneously, in Hold or separately.

13. *Solo Spin (Pirouette)* – A spinning movement performed on one foot on the spot by one partner alone (with or without the assistance of the other partner) or by both partners simultaneously (around separate centers);

14. *Dance Spin*

a) *Dance Spin* – A spin skated by the Couple together in any hold. To be performed on the spot around a common axis on one foot with or without change(s) of foot by one or both partners;

b) *Basic Positions in Dance Spins*

i) *Upright Position* – Performed on one foot with skating leg straight or slightly bent and upper body upright (on a nearly vertical axis), arched back or bent to the side.

ii) *Sit Position* – Performed on one foot with skating leg bent in a one-legged crouch position and free leg forward, to the side or back;

iii) *Camel Position* – Performed on one foot with skating leg straight or slightly bent and body bent forward and free leg extended or bent upward on a horizontal line or higher.

15. *Leg and Foot Positions*

- a) *Coupée* – The free foot is held up in contact with the skating leg from an open hip position so that the free foot is at a right angles to the leg of the skating foot;
- b) *Passé* – The free foot is brought up to the side of the skating leg from a closed hip position so that the free foot is parallel to the leg of the skating foot;
- c) *Attitude* – The free leg is bent, and brought up out and behind at a ninety degree angle to the leg of the skating foot.

16. *Dance Lift* – A movement in which one of the partners is elevated with active and/or passive assistance of the other partner to any permitted height, sustained there and set down on the ice. Any rotations and positions and changes of such positions during the lift are permitted. Lifts should enhance the music chosen and express its character and should be performed in an elegant manner without obvious feats of strength and awkward and/or undignified actions and poses. Types of Dance Lifts are classified as follows:

Short Lifts – the duration of the lift should not exceed seven seconds

- a) *Stationary Lift* – A lift that is executed on the spot (stationary location) by the lifting partner who may or may not be rotating;
- b) *Straight Line Lift* – A lift in which the lifting partner travels in a straight line in any position on one foot or two feet;
- c) *Curve Lift* – A lift in which the lifting partner travels on one curve (lobe) in any position on one foot or two feet;
- d) *Rotational Lift* – A lift in which the lifting partner rotates in one (clockwise or anticlockwise) direction while travelling across the ice.

Combination Lifts – the duration of the lift should not exceed 12 seconds. A lift combining:

- e) *two Rotational Lifts (as per paragraph d) above):* in different directions;
- f) *two Curve Lifts:* on two different curves forming a serpentine pattern;
- g) *two different Types of Short Lifts a), b), c) or d) above.*

17. *Jumps*

- d) *Hop* – A small jump without revolution.

18. *Types of Movements*

- a) *Crouch* – A two-footed movement in which a Skater travels along the ice with both legs bent at an angle;

 - c) *Lunge* – A movement in which a Skater travels along the ice with one leg bent and the other leg directed behind with the boot/blade touching the ice;
 - d) *Pivot* – A two footed movement in which the toe picks of one foot are inserted into the ice by a Skater as a central pivoting point while the other foot travels in a circular pattern around the pivot point;
 - e) *Shoot the Duck* – A one foot movement in which a Skater travels along the ice with one leg in a strongly bent position and the other leg directed forward parallel to the ice;
 - f) *Spread Eagle* – A two-footed movement in which a Skater travels along the ice with one foot on a forward edge/tracing and the other on a matching backward edge/tracing on the same tracing.
19. *Choreographic Element* – Listed or unlisted movement or series of movement(s) as specified by the Ice Dance Technical Committee.
20. Any variation(s) or combination(s) of Turns/Steps/Movements/Spins/Lifts approved by the Ice Dance Technical Committee and published in an ISU Communication when applicable.
21. *Illegal Elements/Movements/Poses* – The following elements, movements and/or poses are illegal in Rhythm Dance, Free Dance and in the Pattern Dances including the introductory and concluding steps (unless otherwise stated in an ISU Communication):
- a) sitting on the partner's head;

 - c) lifted partner in upside down split pose (with sustained angle between thighs more than 45 degrees);
 - d) lifting partner swinging the lifted partner around by holding the skate(s)/boot(s) or leg(s) only with fully extended arm(s)

- e) lifting partner swinging the lifted partner around without the assistance of hand(s)/arm(s) and the lifted partner holding only with feet around the lifting partner's neck;
- f) point of contact of the lifting hand(s)/arm(s) of the lifting partner with any part of the body of the lifted partner is sustained with the fully extended arm(s) higher than the lifting partner's head (the supporting arm may be sustained and fully extended above the head);
- g) Jumps of more than one revolution except Jump Entry and/or Jump Exit;
- h) Lying on the ice.

A brief movement through poses a) to f) will be permitted if it is not established and sustained or if it is used only to change pose.

Rule 705

Dance Holds

1. *Hand-in-Hand Hold*
 - a) Facing in same direction – The partners face in the same direction and are skating side by side or one behind the other with their arms extended and their hands clasped. A variation of this is the arm-in-arm side by side hold.
 - b) Facing in opposite directions – The partners usually face each other while one skates backward and the other skates forward with the arms extended to the side but sometimes the hold can be skated back to back (example: Steps 22 to 25 in the Cha Cha Congelado).
2. *Closed or Waltz Hold* – The partners are directly opposite each other. One partner faces forward while the other partner faces backward. The Man's right hand is placed firmly on his partner's back at the shoulder blade with the elbow raised and the arm bent sufficiently to hold the Woman close to him. The left hand of the Woman is placed at/on the shoulder of the Man so that her arm rests comfortably, elbow to elbow, on his upper arm. The left arm of the Man and the right arm of the Woman are extended comfortably at shoulder height. Their shoulders remain parallel.
3. a) *Open or Foxtrot Hold* – The hand and arm holds are similar to those of the Closed or Waltz Hold. The partners simply turn slightly away from each other so that they both face in the same direction.

- b) *Crossed Foxtrot Hold* – The partners are in the same hold as above except that the Man's right arm passes behind the Woman and his right hand is on her right hip, and the Woman's left arm passes behind the Man and her left hand is on his left hip.
4. *Outside or Tango Hold* – The partners face in opposite directions – one partner skating forward; the other partner backward. However, unlike the Closed Hold, the partners are offset with the Man to the right or left of the Woman so that the front of his hip is in line with the front of her corresponding hip. Tight hip-to-hip position is undesirable since it impedes flow.
5. a) *Kilian Hold* – The partners face in the same direction – with the Woman to the right of the Man and his right shoulder behind her left. The left arm of the Woman is extended across the front of the Man's body to hold his left hand. His right arm crosses behind the Woman's back to clasp her right hand. Both right hands rest over her hip bone;
- b) *Reversed Kilian Hold* – This hold is similar to the Kilian Hold but with the Woman at the Man's left;
- c) *Open Kilian Hold* – The Man's left hand holds the Woman's left hand, with his right hand resting over the Woman's left hip or behind her back. The Woman's right arm is extended. This hold may also be reversed;
- d) *Crossed Kilian Hold* – The Woman's left arm is extended across the front of the Man's body to his left hand, while his right arm is extended across in front of her body with both partners' right hands resting clasped over her hip. This hold may also be reversed;
- e) *High Kilian Hold* – A Kilian Hold in which one pair of the joined hands are elevated to slightly above shoulder height with the elbows slightly bent (example: Steps 3 to 12 in the Yankee Polka).
6. *Leading Hand* – The leading hand of the Man is the right hand except in the case of "Reversed" hold when it is the left hand.
7. *Promenade* – A type of "progressive" skated in Open Hold by a Couple on the same (example: Steps 9 to 11 in the Blues) or opposite (example: Steps 16 to 19 in the Tango) feet derived from a similar forward walking movement in some ballroom dances.

Note: photographs of all Dance Holds listed above are found in the ISU Handbook Ice Dance 2003. In certain cases, some Dance Holds cannot be defined by standardized descriptions.

Rule 706
Musical definitions

1. *Beat* – A note defining the regular recurring divisions of a piece of music.
2. *Tempo* – The speed of music in Beats or Measures per minute.
3. *Rhythm* – The regularly repeated pattern of accented and unaccented Beats which gives the music its character.
4. *Measure (Bar)* – A unit of music which is defined by the periodic recurrence of the accent. Such units are of equal number of Beats.
5. *Strong Beat* – The first Beat of the Measure or group of two Measures supporting the skating count of the Rhythm.
6. *Weak beat* – For Rhythms with a skating count on two Measures, the first Beat of the second Measure (examples: skating count 3 of the Quickstep; skating count 4 of the American Waltz). The skating count of each Rhythm is explained in the ISU Ice Dance Rhythms Booklet & Compact Disc.

4. All Pattern Dances shall be started so that the steps of the first side of the pattern are skated in front of the Judges unless otherwise directed by the Ice Dance Technical Committee in an ISU Communication.
5. In International Competitions, the current series of ISU Ice Dance music shall be used for the Pattern Dance unless the Ice Dance Technical Committee has decided that the music for one or several Pattern Dances is to be provided by the Couple, following certain requirements, as announced in an ISU Communication. In this case, Pattern Dance music that does not adhere to these specifications will be penalized by deduction(s) (see Rule 353, paragraph 1. n).

When ISU Ice Dance music is used, five pieces of music will be played, unless otherwise directed in an ISU Communication, for each Pattern Dance from ISU tunes 1 to 5. For each starting group the

music will be played in the above mentioned numerical order. The last (sixth) tune of each dance shall be only used during the warm-up of each starting group.

6. After the completion of the last step of the Pattern Dance, the couple must reach their final pose within 20 seconds. If this time limit is exceeded a deduction according to Rule 353, paragraph 1. n) shall apply.
7. An interrupted Pattern Dance shall be resumed at the nearest technically practicable point in the step sequence and which must be after the point of interruption. The Couple may not skate the steps missed by the interruption.

Rule 708 **Requirements and marking**

1. General requirements for Pattern Dances
 - a) *Accuracy* – The steps, edges, elements/movements and dance holds must be in accordance with the dance description and the Rules. Subject to general conformity with the basic requirements, some latitude is given to allow a Couple to demonstrate their own individual style. This is usually accomplished by the use of a variety of arm and/or leg movements. Movements or positions of arms and/or hands, which differ from those specified in the descriptions of the required dance holds are permitted, provided that the Leading Hand of the Man remains in the prescribed position for the hold;
 - b) *Placement* – The pattern of the dances must be in accordance with the Rules. Maximum utilization of the ice surface is desirable, which requires deep edges and good flow. Ice coverage must not be obtained by the use of flat or shallow edges. In a regulation-sized rink (Rule 342), the Couples may not cross the Long Axis. In rinks less than regulation-size, the Couple may cross the Long Axis proportionally to the width of the rink;
 - c) *Skating Skills* – Good basic skating skills are required: Deep edges skated with speed, flow and easy glide in an effortless manner. Cleanness and sureness of steps, edges and lobe transitions evident. The Skaters must carry their weight over the skating foot. Footwork must be neat and precise. Two-footed skating must be avoided except where it is required. Good and equal technical ability are required for both partners. The knee of the skating leg should be flexible with a rhythmic

rise and fall. On Chassés and Progressives the feet must be lifted a small distance from the ice;

- d) *Timing* – The dances must be skated in strict time to the music with the start of the first step of the dance on beat 1 of the ninth measure of the particular tune (unless otherwise specified in the description of the Pattern Dance or by the Ice Dance Technical Committee and announced in an ISU Communication). The prescribed number of beats employed for each step/movement must be in accordance with the Rules. All movements must be coordinated with the rhythm of the music so that all steps are completed without any break in continuity;
- e) *Style* – Carriage should be upright but not stiff with the head held up. All actions should be easy and flowing and performed in an elegant manner. The Dance Holds (see Rule 705), should be firm and the fingers neither spread nor clenched. There should be no apparent struggle for speed and speed should not be obtained at the expense of good style. The free leg should be extended; the foot turned out and pointed down;
- f) *Unison* – The Couple should skate as close together as possible keeping a constant distance between them. All movements such as leg swings, knee bends and lean should be equal and well-coordinated and their performance should be balanced. The partners should move as one. The Man should show his ability to lead and the Woman to follow;
- g) *Presentation* – The dance must be skated smoothly and rhythmically with the character of the music being correctly displayed. Such interpretation shall be shown by variations in the execution of dance movements, which reflect the rhythm patterns in the music. The overall effect should be such that each Pattern Dance has a distinct flavor. The partners should relate to one another.

2. Required Sections of Pattern Dances

The pattern of each Pattern Dance may be divided into a certain number of Sections published and updated in an ISU Communication. The number of Sections of the particular dance depends on its length (number of steps) and number of Sequences in the dance.

3. Marking Pattern Dances

a) Technical Score

i) Scale of Values

A table with the Scale of Values of the Sections of the Pattern

Dances is published and updated in ISU Communications. This Scale of Values (SOV) contains Base Values of all the Sections of each Pattern Dance and adjustments for the correctness and quality of their execution;

ii) Levels of Sections

For Novice Competitions and for competitions having specified such procedure in their Announcement, Technical Specialists will determine the Level of every Section in the Pattern Dance (if a description of Levels of Sections and corresponding Scale of Value are available for that Pattern Dance in an ISU Communication);

The description of characteristics that give a Section a certain Level is published and updated in ISU Communications.

iii) Grade of Execution (GOE)

Every Judge will mark the quality of execution of every Section of the Pattern Dance depending on the positive and negative features of the execution and errors on the eleven grades of execution scale: +5, +4, +3, +2, +1, Base Value, -1, -2, -3, -4, -5. Each + or - grade has its own + or - numerical value indicated in the SOV Table. This value is added to the Base Value of the Section or deducted from it;

The guidelines for marking of Sections/Sequences are published and updated in ISU Communications.

b) Components Score

i) Component definitions

In addition to the Technical Score each Judge evaluates the Couple's whole performance in the Pattern Dances by three Components (Timing, Presentation, Skating Skills), unless otherwise specified in an ISU Communication.

TIMING

Definition:

The ability of the Couple to skate strictly in time with the music.

Criteria:

- Musical sensitivity
- Skating in time with the music
- Skating on the strong beat
- Start of the first Step on beat 1.

PRESENTATION

Definition:

Through the involvement of the Skaters, the display of the correct rhythm or style as required by the description of the dance or by the specific style of the dance.

Criteria:

- Expressiveness and projection
- Unison and awareness of space.

SKATING SKILLS

Definition:

The ability of the Couple to precisely execute dance steps and movements in accordance with the dance description with power, balance, depth of edges, easy transition from one foot or lobe to the other, glide and flow.

Criteria:

- Clarity of edges, steps, turns, movements
- Overall skating quality
- Balance and glide
- Flow
- Power and speed
- Ice coverage.

ii) Marking of Components

Components are evaluated by Judges after the completion of the dance on a scale from 0.25 to 10 with increments of 0.25. Points given by the Judges correspond to the following degrees of the Components: <1- extremely poor, 1 very poor, 2 - poor, 3 -weak, 4 - fair, 5 - average, 6 - above average, 7 - good, 8 - very good, 9 to 9.75 - excellent, 10 - outstanding. Increments are used for evaluation of performances containing some features of one degree and some of the next degree.

Guidelines for judging are published and updated in ISU Communications.

c) Deductions

Deductions are applied for certain violations according to Rule 353.

C. Rhythm Dance

Rule 709

1. General Requirements for the Rhythm Dance

a) Rhythm Dance is a dance created by an Ice Dance Couple to dance music with designated rhythm(s) and/or theme(s) selected by the Ice Dance Technical Committee annually for the season. The dance must:

- i) reflect the character of the music / the selected dance rhythm(s) and/or theme(s);
- ii) be translated to the ice by demonstrating the repertoire of technical skill with a variety of steps, turns, and movements executed precisely and completely along with balance and glide, flow, power and speed and unison;
- iii) be delivered with unison, in harmony and spatial awareness;
- iv) fit to the phrasing of the music.

Couples must skate primarily to the rhythmic beat. The dance will contain elements selected by the Ice Dance Technical Committee from the list of required elements specified in paragraph 2 below. Elements should be integrated into the composition of the dance so the concept and choreography must produce the feeling of a unified dance. The rhythm (or group of rhythms) and/or theme(s) as well as the guidelines and technical requirements for the Junior and Senior programs, including specified elements will be decided annually by the Ice Dance Technical Committee and published in an ISU Communication.

- b) The duration of the Rhythm Dance is indicated in Rule 502, paragraph 3.
- c) The music for the Rhythm Dance, including music for the specified Pattern Dance (if required) is to be provided by the Couple. The music may be vocal and must be suitable for Ice Dance as a sport discipline. The music must have the following characteristics:
 - i) Only dance music with an audible rhythmic beat may be used. The music may be without an audible rhythmic beat for up to 10 seconds at the beginning of the program;
 - ii) The music must be selected in accordance with the designated rhythm(s) and/or theme(s);

- iii) The music selected must have a constant tempo and be in accordance with the specified tempo, when applicable.
Rhythm Dance music that does not adhere to these specifications will be penalized by deduction(s) (see Rule 353, paragraph 1. n)). The Couple is required to submit the name/title of the selected music and the rhythm(s)/theme(s) of their program when registering their music for the information of the Referee and Judges.
- d) The pattern must proceed in a generally constant direction and must not cross the Long Axis of the ice surface except once at each end of the rink (within no more than 30 meters of the barrier). Loops in either direction are permitted provided that they do not cross the Long Axis (unless specified by the Ice Dance Technical Committee and announced in an ISU Communication).
- e) All dance steps, turns, rotations and changes of position are permitted provided that they are appropriate to the designated rhythm(s) and the music chosen. Repetition of any steps, turns and movements is permitted. Difficult, original, varied and intricate footwork is required for both partners.
- f) There are no restrictions on Dance Holds (or variation thereof). Skating in Hand-in-Hand Hold with fully extended arms is permitted only if in the character of the rhythm chosen, but must not be used excessively.
- g) Partners must not separate except to change hold or to perform Required Elements requiring a separation, Turns as transitional elements and moves during the permitted stops. The distance between partners during such separations should not exceed two arm lengths. Change of hold and Turns as transitional elements must not exceed the duration of one measure of music. Separations at the beginning and/or end of the program may be up to 10 seconds in duration without restrictions on the distance of the separation, unless otherwise specified in an ISU Communication.
- h) After the clock is started with the first movement, the Couple must not remain in one place for more than 10 seconds at the beginning and/or the end of the program. During the program up to two full stops in addition to stops required in Required Elements are permitted (duration must not exceed 5 seconds each) unless otherwise specified in an ISU Communication.
- i) The program must be developed through skating skill and quality rather than through non-skating actions such as sliding on one knee, or use of toe steps which should be used only to reflect the character of the dance and underlining rhythm and nuances of the chosen music. In the interest of the public in the arena, programs

should be choreographed to all sides of the arena and not only focused to Judges' side.

- j) Touching the ice with the hand(s) is not permitted. Unless otherwise allowed by the IDTC and announced in a Communication.
- k) Kneeling or sliding on two knees, or sitting on the ice is not allowed and it will be considered by the Technical Panel as a Fall unless otherwise announced in an ISU Communication.

2. Required Elements

The list of Required Elements to be included in the Rhythm Dance and specific requirements for these elements will be announced in an ISU Communication annually.

The following are options that may be included as Required Elements:

- Dance Lift(s) – see Rule 704, paragraph 16;
- Dance Spin(s) – see Rule 704, paragraph 14;
- Turn Sequence(s) – see Rule 704, paragraph 12;
- Step Sequence(s) – see Rule 703, paragraph 4;
- Pattern Dances Element(s) – see Rule 703, paragraph 6 (Pattern Dance Element as per Rule 703, paragraph 6. a) or 6. b) included in the Junior Rhythm Dance as set Required Element(s);
- Choreographic Element(s) see Rule 704, paragraph 19.

D. Free Dance

Rule 710

1. General Requirements for the Free Dance

- a) Free Dance is the skating by the Couple of a creative dance program blending dance steps and movements expressing the character/rhythms(s) of the dance music chosen by the Couple;

The Free Dance must contain combinations of new or known dance steps and movements including Required Elements composed into a well-balanced, whole unit displaying excellent skating technique and the personal creativity of the Couple in concept, arrangement, and expression. The program, including Required Elements, must be skated in time and phase with the music. The Couple should skate primarily in time to the rhythmic beat, and not to the melody alone. The choreography should clearly reflect the dance character, accents and nuances of the

chosen dance music, demonstrating a close relationship between partners with obvious, distinct changes of mood and pace with variations in speed and tempo. The program must utilize the whole ice surface. The Free Dance must not have the concept of a Pair or show program.

- b) The duration of the Free Dance is indicated in Rule 502, paragraph 4.
- c) The music for Free Dance may be vocal and must be suitable for Ice Dance as a sport discipline and must have the following characteristics:
 - i) The music must have an audible rhythmic beat and melody, or an audible rhythmic beat alone, but not melody alone, and may be vocal. The music may be without an audible rhythmic beat for up to 10 seconds at the beginning or at the end of the program and up to 10 seconds during the program.
 - ii) The music must have at least one change of tempo/rhythm and expression. These changes may be gradual or immediate.
 - iii) All music including classical music must be cut/edited, orchestrated or arranged in a way that it creates an interesting, colorful, entertaining dance program with different dance moods or a building effect.

Free Dance music that does not adhere to these requirements will be penalized by a deduction (see Rule 353, paragraph 1.n).

- d) All steps and turns are permitted. Deep edges and intricate footwork displaying skating skill, difficulty, variety and originality that constitute the distinct technical content of the dance must be included in the program and performed by both partners. In the interest of the public in the arena, programs should be choreographed to all sides of the arena and not only focused to Judges' side.
- e) All elements and movements are permitted provided that they are appropriate to the character of the music and to the concept of a Well-Balanced Program and are in accordance with the definitions in Rule 704.
- f) The number of separations to execute transitional footwork or moves is not restricted. The distance between partners should not exceed two arms lengths. The duration of each such separation, outside of Required Elements requiring a separation, must not exceed 5 seconds. Separations at the beginning and/or end of the program may be up to 10 seconds in duration without restrictions on the distance of separation, unless otherwise specified in an ISU Communication.

- g) All changes of hold are permitted. Many and varied holds increase the difficulty of the program and therefore, should be included. Skating face to face is considered to be more difficult than skating side by side, hand in hand, separately or one after the other.
- h) After the clock is started with the first movement, the Couple must not remain in one place for more than 10 seconds at the beginning and/or end of the program. During the program full stops (up to 5 seconds) in addition to stops required in Required Elements, in which the Couple remains stationary on the ice while performing body movements, twisting, posing and the like are permitted, unless otherwise specified in an ISU Communication.
- i) The program must be developed through skating quality rather than through non-skating actions such as sliding on one knee, or use of toe steps which should be used only to reflect the character of the dance and underlining rhythm and nuances of the chosen music.
- j) Touching the ice with the hand(s) is not permitted.
- k) Kneeling or sliding on two knees, or sitting on the ice is not allowed and it will be considered by the Technical Panel as a Fall unless otherwise announced in an ISU Communication.

2. Well-Balanced Free Dance Programs

The list of Required Elements to be included in a Well-Balanced Program for Novice, Junior and Senior Free Dances and the specific requirements for those elements will be announced in an ISU Communication annually. The following are options that may be included as Required Elements:

- Dance Lift(s) – see Rule 704 paragraph 16;
- Dance Spin(s) – see Rule 704 paragraph 14;
- Step Sequence(s) – see Rule 703 paragraph 4 (Groups A and B);
- Turn Sequence(s) – see Rule 704 paragraph 12;
- Choreographic Element(s) – see Rule 704, paragraph 19.

**E. Announcement and draw of Pattern Dances and
announcement of requirements for Rhythm Dance and Free Dance**

Rule 711

1. For Novice International Competitions, the lists of Pattern Dances will be announced annually by the Ice Dance Technical Committee in an ISU Communication not later than June 1st, to become effective on July 1st of the year following the announcement. For other International Competitions which include a Pattern Dance(s) Segment, the Pattern Dance(s) to be skated may be decided by the Organizers and included in the Announcement. If a draw is required, the Pattern Dance(s) to be skated shall be drawn on site and announced prior to the first official practice. The draw shall be carried out by the Referee in the presence of, if possible, one participating Couple.
2. a) The specific requirements for the Rhythm Dance and Free Dance will be decided annually by the Ice Dance Technical Committee and announced in an ISU Communication;
b) The specific requirements announced for the Rhythm Dance and Free Dance must be used at all ISU Championships and International Competitions during the year, from July 1st to June 30th, for which they are announced.
3. All Communications concerning technical requirements must be published before June 1st except for pending decisions as a result of a Congress, clarifications and additional examples which may be published as needed.
